

Kalele Kai Pool Renovation

August 26 – November 2024

The long-awaited pool renovation is finally underway, marking a significant upgrade for our association. While the changes may not be drastic, they are aimed at enhancing the overall enjoyment of the pool for all residents of Kalele Kai. We understand that everyone is curious about the outcome, so we wanted to share some highlights of the improvements you can look forward to.

POOL AND SPA	<p>The shape of the pool and jacuzzi will remain the same. The tiles will be removed and replaced with plaster and a new waterline. We'll be preserving the existing hues of blue to maintain a calming and relaxing atmosphere while introducing a more modern and refreshing look. In addition, we'll be installing new and improved railings and step ladders, and a saltwater chlorination system will be added.</p>
LANDSCAPING	<p>Our expert arborist has recommended removing the palm trees on the pool deck, as they are soon reaching the end of their lifespan. We look forward to planting a different variety of palms that will complement our new deck. Additionally, we will be updating other lush landscaping with careful consideration to maintain the vibrant greenery that Kalele Kai is known for.</p>
DECK	<p>The old pool deck will be demolished and replaced with new stamped concrete in neutral tones. We will also be reconfiguring the deck to create additional seating and lounging areas.</p>
SAFETY	<p>The Board of Directors and management are taking this opportunity to enhance the overall safety of the pool, with a strong focus on the well-being of our residents. The pool railings, signage, and life-saving equipment will be upgraded. Additionally, the pool area wall will be added where the current wire fencing is and be built on top of the existing benches along the outside edge to allow for more comfortable seating, and allow for proper draining of the pool deck.</p>
